

Product overview

KMS-110 electrode transition cable

The KMS-110 electrode transition cable is developed to provide an adapter form the KMS-820 plug to electrode directly or electrode extension cable.

Product specifications

- Ruggedized cable design, following seismic industry field cable standard
- Using twisted pair connection for fail proof performance. REDUNDANT wiring reduces breakage risk
- Flexible, anti-scraped and anti-cut, livestock deterrent using polyurethane jacket cable
- Connector is waterproof with 2 banana connectors (male & female)
- Dust cap, protecting connector during storage and transportation
